

DYNAMIC IDF BALANCER MK1 CASE STUDIES

The following are actual case studies of outcomes using the balancer.

CASE 1 – VEHICLE IMPROVED FUEL CONSUMPTION, JAN 2022

A Toyota RAV4, 2L automatic, 1999 model with 193000 km on the clock was balanced 6 times for 10 minutes at a time using the photograph below during December 2021.

The intent was as follows; “I am grateful that the car now gives the best possible fuel consumption”.

The absolute best long distance consumption measured during the last 9 years was 11.9 km/l driving at 120 km/h.

On a recent trip to the Northern Cape and driving in heavy rain, the consumption improved to 12.34 km/l. This improved further to 12.92 km/l (7.73 l/100 km) when driving in clear and warm weather with the air-conditioner on. No changes were done to the vehicle and the only explanation for the improved consumption is the balancing with intent.

RAV 4

CASE 2 – VEHICLE IMPROVED STARTING AND IDLING, DEC 2021

A Renault Cleo, 2019 model with 99000 km on the clock in KZN had a problem starting and idling every morning. The general driveability was also very poor and jerky.

The first balancing of the vehicle was done evening 12th December 2021 in Gauteng with 10 min remedy imprinting and 10 min balancing duration. A second was done the following

morning (13th December 2021). The intent was; “I am grateful for the repair and rebalancing if the vehicle”.

A WhatsApp voice note from the owner (daughter of balancer operator) noted with amazement that the car started first time and idled perfectly. She took the car on a test run and reported that it’s the best the car has ever performed.

The car is still operating (28th January 2022) as it did after the balancing.

Cleo

CASE 3 – HEALING OF DOG’s DERMATITIS AND RELIEF FOR ARTHRITIS, DEC 2021

Astrid is an 8-year-old female German Sheppard. Just before her 5th birthday she started having problems in that it seemed that her legs were giving in. In addition to this she showed signs of dermatitis. Her fur also had a huge amount dry skin. The last 6 years she went to at least 10 vets, had injections in her back for vertebra that may have moved and started numerous treatments for dermatitis. Finally, a vet in Benoni diagnosed her with arthritis and confirmed it with x-rays.

Astrid used to go once a month for injections and meds to slow down the arthritis, and meds for her dermatitis.

Radionics balancing for both the arthritis and the dermatitis started on 11th December 2021 and continue on a daily basis. Intent is: “I am grateful for the healing of Astrid’s arthritis and thank you for the healing of her dermatitis”.

Scaring

After the 4th balancing her skin cleared up and showed no flaking at all.

On the 22nd of January 2022, Astrid managed to jump up on the couch by herself and she is more playful and happier.

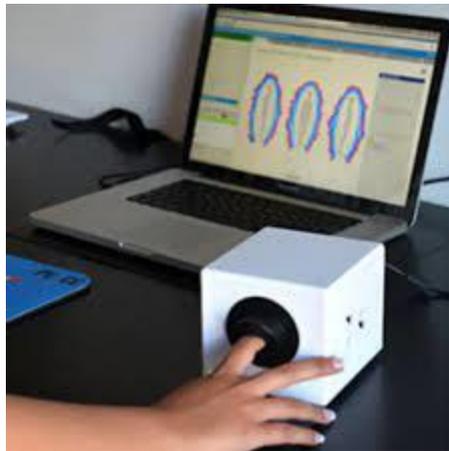

Astrid on bench

DYMAMIC IDF BALANCER MK1 CASE STUDIES

The following are actual case studies of outcomes using the balancer.

CASE 4 – BEFORE AND AFTER BIO WELL GDV SCANS, FEB 2022

A complete Gas Discharge Visualization (GDV) scan was done on the same witness on 10 February 2022 by Marijna de Lange, a certified Bio Well practitioner. The scan involved scanning each of the ten finger tips and then using the very sophisticated software to analyse the various energy patterns.

Bio Well scanner and software

After the scan the witness was balanced for the default 20 minutes and the scan repeated to specifically look for any changes in the energy patterns.

The following pictures are before/after results obtained from the reports generated by the Bio Well system:

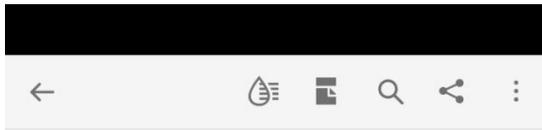

The left *before* diagram shows the chakra's not fully aligned but still within normal limits.

The right *after* diagram shows the nearly perfectly aligned chakra's except for the heart chakra.

Marijna is also a certified *Life-alignment system for energy healing (Jeff Levine)* practitioner and she used this method to look for a possible root cause for the heart chakra misalignment.

The diagnostic process revealed a mind state that was possibly triggered by a subconscious fear of losing the treasure (unfounded fear) of the balancer design and resulted in placing a protective shield around it which transpired as the unbalanced heart chakra. She subsequently balanced the heart chakra remotely.

CHAKRA BALANCE

Dr. Korotkov

Chakras

Alignment 87%

According to Eastern metaphysical theories and principles of Ayurvedic Indian medicine, there are seven "Chakras" or integrated energy centers that are considered to affect physical, mental, emotional, and spiritual well-being. In the Bio-Well programs Chakras reflect emotional state of a person. Chakras are related to energy flow internally and externally. They are not stable and may change every other minute. Stability of Chakras is indication of emotional balance of a person. Ideal balance of Chakras may be seen for people involved in daily meditation and mental training.

Shift of Chakras to the right or left (when we look to the picture) can be related to the inner emotional reactions of a person or to the response to environmental situation (other people, electromagnetic fields, weather, etc).

Dr. Korotkov

Chakras

Alignment 92%

According to Eastern metaphysical theories and principles of Ayurvedic Indian medicine, there are seven "Chakras" or integrated energy centers that are considered to affect physical, mental, emotional, and spiritual well-being. Stability of Chakras is indication of emotional balance of a person. Ideal balance of Chakras may be seen for people involved in daily meditation and mental training.

Shift of Chakras to the right or left (when we look to the picture) can be related to the inner emotional reactions of a person or to the response to environmental situation (other people, electromagnetic fields, weather, etc).

Dr. Korotkov

Chakras

Psychosomatic approach. Connection of functional state of organs with psychological state.

Energy centers (or Chakras) are calculated according to the organs and systems situated in different parts of the body.

Size of the center - medium level of energy of organs and systems that correspond to this center.

Dr. Korotkov

Chakras

Psychosomatic approach. Connection of functional state of organs with psychological state.

Energy centers (or Chakras) are calculated according to the organs and systems situated in different parts of the body.

Size of the center - medium level of energy of organs and systems that correspond to this center.

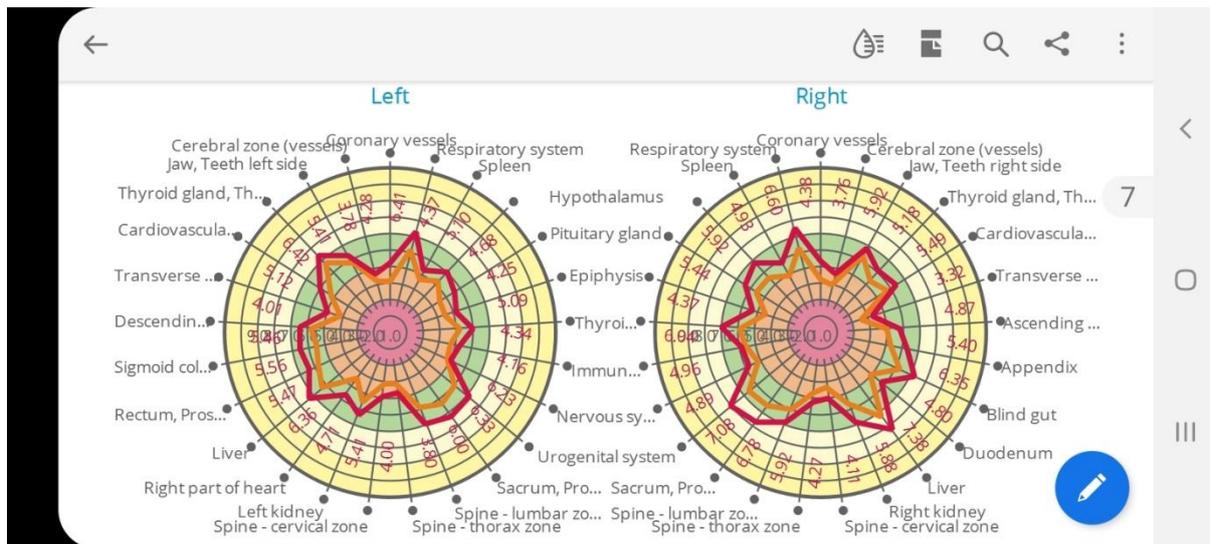

Balance of the center (Left/right orientation) - is the difference between the energies of the corresponding to the specific center organs and systems on the left and right hands.

Grey/green corridor on the graph - norm. Left side from the center of the image - social life, extroversion. Right side - private life, introversion.

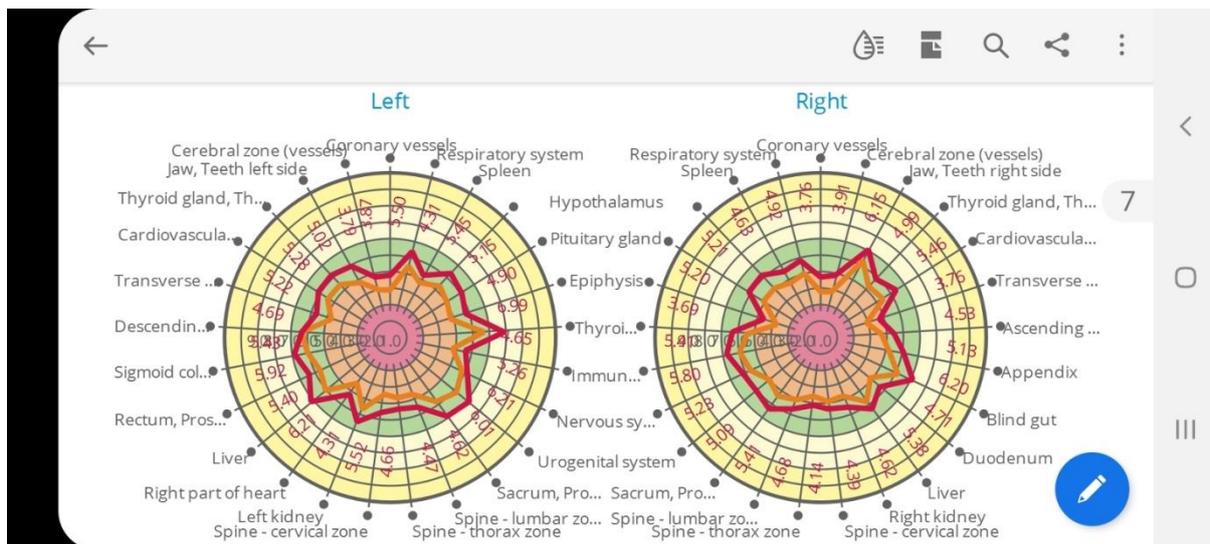

Chakra 1 - Red - self-confidence, sexual power. Extreme right - shy and not self-confident person. Extreme left - too self-

Apart from the green heart chakra shift it is clear to see the improved balance of the rest after the scan.

LEFT AND RIGHT ENERGY DIAGRAMS

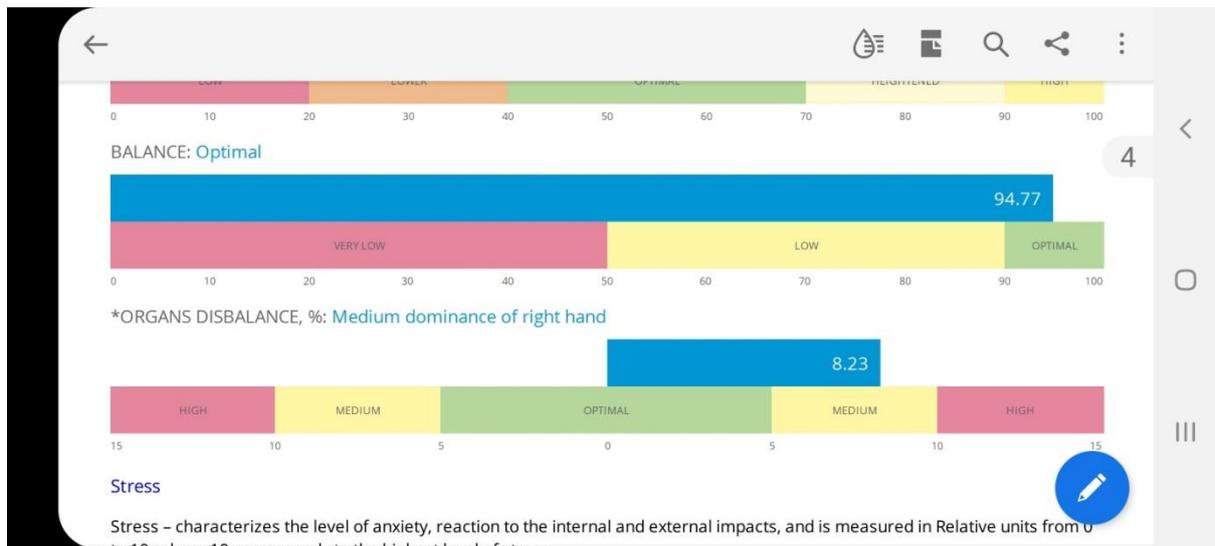

Before energy diagrams, note the liver and urogenital energies

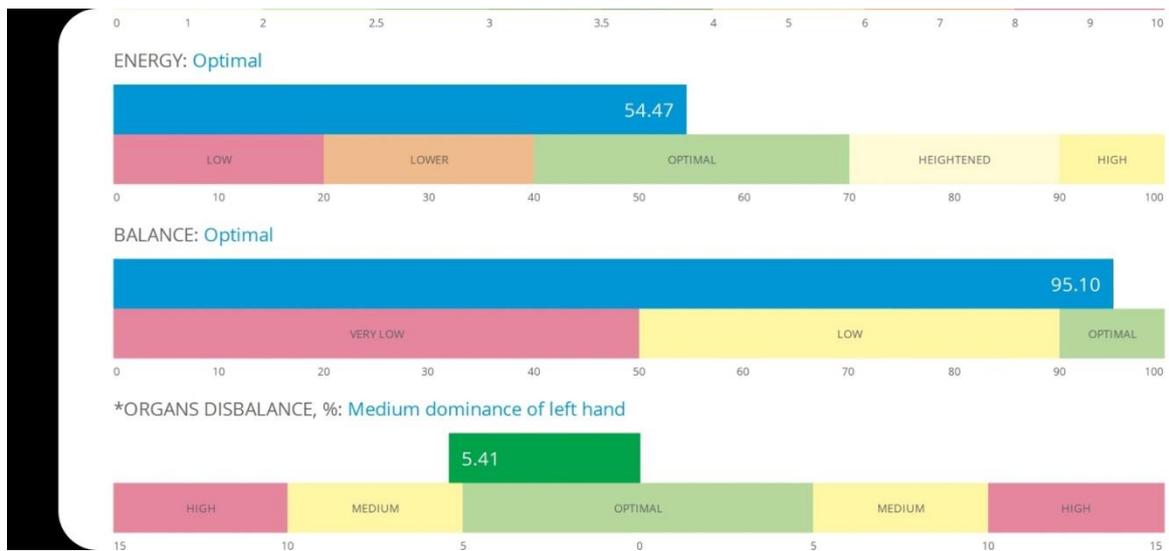

After energy diagrams with liver and urogenital energies now normal and average also less

ORGAN BALANCE

Before organ balance showing dominant right

After organ balance showing improved dominance and optimal balance

SUMMARY REPORTS

energy (56):
- Optimal level of energy

Balance is equilibrium between left and right parts of the brain. Measure of harmony. (95%):
- Optimal balance of the left/right parts of the brain. You can cope with stress and problems by yourself.

Area diagram left (0.16):
- Optimal level of homeostais. Balanced power inputs and energy consumption.

Area diagram right (0.29):
- Optimal level of homeostais. Balanced power inputs and energy consumption.

Energy diagram (76.48):
- Optimal energy diagram

Balance:
- Optimal autonomic balance

Organs of attention:
- Liver
- Urogenital system

24 III

Before summary report indication organs of attention

Stress (3):
- Anxiety level increased, activation of reaction to the external influences.

Energy (54):
- Optimal level of energy

Balance is equilibrium between left and right parts of the brain. Measure of harmony. (95%):
- Optimal balance of the left/right parts of the brain. You can cope with stress and problems by yourself.

Area diagram left (0.18):
- Optimal level of homeostais. Balanced power inputs and energy consumption.

Area diagram right (0.06):
- Optimal level of homeostais. Balanced power inputs and energy consumption.

Energy diagram (68.98):
- Optimal energy diagram

Balance:
- Optimal autonomic balance

23 III

After summary report indicating no organs of attention

CONCLUSION

From the above results it is clear that the balancing did show a marked positive change in energy patterns as measured and analysed by the Bio Well system.

CASE 5 – BALANCER ASSISTS WITH PSYCHIATRIC ISSUE

My name is Yvonne, a friend of mine from Cape Town was due to go back via Durban where she was going to see a couple, long term friends of hers, lovely people, I met them many years ago. Yesterday afternoon she got a phone call from the lady friend begging her for help, she was screaming, saying that “they have come to take me away, the police are here please help me they

want to put me in hospital, I know they will kill me. It was very dramatic. My friend phoned me so I said, "lets get her onto the balancer" My friend then spoke to the partner and he said "this lady has had a couple of jabs, I don't know if it is related to that but she has, over the last couple of months gone bipolar". She is spending all his money, fighting, shouting, he just can't live with her any more, it is just impossible. She had had another attack of attacking everybody and he phoned for help. I don't know if he phoned the hospital, anyway they sent the police around with hectic bipolar medicine to give her and then to take her to hospital. She just refused to go. She literally went berserk. It was very traumatic and everybody was up and shouting and quite hectic. I immediately got a picture of her and I put her onto the balancer for peace and harmony, wellbeing and protection. We then did the same for her partner because he could not live with her any more. The drama carried on and I put them on for a second round about an hour later. My friend phoned me and she said "the cops have gone, they went off with the meds, they were hectic bipolar meds, she knew them because they had tried this on her before and everything is peaceful and calm and the two of them are getting together. They have decided that they need to go away together and talk and resolve their issues". So that is where it is at, totally calm and peaceful.

CASE 6 – BALANCER HELPS TO FIND MISSING RINGS

This case is quit simple, my daughter, about 5 days ago was on her way to Natal for a holiday and she said "oh gosh mom I have lost 3 gold rings, I just can't find them anywhere". She was quite stressed about it so I said to her "don't worry you have probably put them in a stupid place, when you come back you can have a good look". She came back 2 days ago and she turned the house upside down and she could not find the and it really put her on a downer. She started to wonder if anyone had taken them, she does not normally think along those lines so she took a dip. I said blow this so I balanced her with the intention "rings found". Within about 10 minutes she phoned me "I found my rings". The had found them in the most crazy place, they were in her car. So that was a really simple one and it worked within 30 minutes.
